Projects

Amazon Clone | *HTML—CSS*   ○ View Project

- This developed clone is a structured and visually appealing user interface using HTML and CSS, demonstrating an understanding of web design principles.A complex real-world design is translated into a functional web page, showcasing practical implementation skills and adaptability.

Online Test Application | *Java*   ○ View Project

- This Java program implements an online test application where users can log in, answer multiple-choice questions, and receive their scores. The application consists of two main classes: login for user authentication and OnlineTestBegin for conducting the test. Users log in with a username and password, and upon successful authentication, they proceed to answer a series of multiple-choice questions. The application tracks the user's progress, allows them to save questions for later review, and provides a timer for test completion.

Technical Skills

Languages: Java, C, Basics of Python, SQL, HTML, CSS, JavaScript, PHP, React JS, Angular, Flutter, Dart

Soft Skills

- Communication
